6 Unlocking Modes

App
Unlock the door remotely using the App

Fingerprint
Instant fingerprint detection ensures secure and convenient access

Passcode
Touch the keypad surface to key in your passcode

RFID card
Unlock the door with a simple tap

Mechanical Key
Can serve as a manual backup to unlock the door

eKey
Send an eKey to another TTLock account so the recipient can unlock via the TTLock app

Cloud Management

Easily manage, lock and unlock your smart lock remotely via the app, with real-time notifications, cloud data storage, and full user access control anytime, anywhere.

2-Factor Authentication

An extra layer of security that requires any two forms of verification—such as a fingerprint, PIN, RFID card, or app—allowing users to mix and match based on their preference.

Example:

Privacy Lock

Secures the door from within by disabling all forms of entry—even with approved credentials—for total protection and peace of mind.

Enable

Disable

Instant Alerts & Alarms

Stay instantly informed of any failed access attempts or unauthorised entries, keeping your home protected at all times.

Anti-Peep PIN Shield

Enter random digits before or after your real PIN to keep it safe from prying eyes and fingerprint smudges.
